

Problem Statement: -

- 1) Playback Speed: - Most streaming platforms do not offer the playback speed feature which helps in playing videos slower or faster which is desired by viewers.
- 2) Stream Together: - Many viewers now-a-days want to stream together but can't due to no in-built feature to stream together and 3rd party streaming platforms doesn't provide a much.

Fetnlix Playback	Streaming platforms like Netflix have become very popular and competitive, but they do not offer the option to adjust the playback speed of the videos. This can limit the viewing experience and preferences of some users who want to watch faster or slower. So Fetnlix has his back to all viewers with preferences to watch slower or faster.
Stream	Most streaming platforms does not have a built-in feature that allows users to watch content together with their friends or family online, and chat or react in real time. The feature "Fetnlix" has can enhance the social and interactive aspect of streaming, especially during times when people cannot meet in person.
